DESCRIPTION

Bisect TD is a mobile **PvP tower defense** where every action is a **card**.

Two players face identical waves on mirrored boards while sending enemies and spells to each other's side. The first to clear the final wave wins.

HOW IT PLAYS

Cards build **towers**, cast **spells** and summon **attacks** on the rival's field. Play a tower on its twin to level it up.

The **mana cap** rises every wave: expensive cards only join your cycle once the wave unlocks them. A vertical **swipe** shows the rival's board.

FEATURES

- Real-time 1v1 PvP, 3 to 4 minute matches
- A mana cap that rises every wave
- 30 towers, spells and attacks
- Upgrades earned by playing: victory isn't for sale
